Business Overview

1. Policy and Business Overview

1.1 Vision Objective Goal / Business Strategies

Thai Stanley Electric Public Company Limited is a manufacturer of automotive lighting equipment with international quality. The goal is committed to producing quality products and value added products that the importance and value to all related group with the company sincerely.

Management Policy is to consider customer satisfaction as the first priority by improving every function; quality control, costing, delivery, development, safety, and relationship through Planning – Doing – Checking process cycle.

The Board has set a policy for directors, executives and employees, including corporate governance policies , Code of conduct for Directors and Employees which has been published as a document and distributed to directors, executives and employees for acknowledgment and implementation in this regard, the Board of Directors has determined the yearly plan for reviewing the policy , rules and regulations.

1.2 Background

The Company was first registered as a limited company on 30 May 1980. It manufactured, imported and distributed automotive light bulbs and lighting equipment. That was founded by a Thai-Japanese joint venture between Seng Nguan Hong (Sittipol) Company Limited (currently known as The Sittipol 1919 Company Limited) and Stanley Electric Co., Ltd. of Japan. The Company operates three separate plants, producing auto bulbs, dies and molds, and auto lamps.

During year 1980 - 1990 the company invested Bulb factory , Lamp1 factory and Die & Mold factory, has been investment promoted from BOI for every plant and has registered capital of 10 million baht to 153 million baht

During year 1991 – 2001 , the Company was listed on the SET, and the Company's shares began being traded on the SET under the abbreviation 'STANLY'. In the same year, the Company founded own research and development center with promotional support from the Board of Investment (BOI). This center is mainly engaged in researching and developing products for the Company. In July 1993, the Company was converted into a public limited company.

The company entered into a joint venture in establishing new companies: Lao Stanley Co., Ltd. and Vietnam Stanley Electric Co., Ltd. Stanley Electric Engineering India PVT Ltd. PT. Indonesia Stanley Electric, that also took shares in various companies, such as Inoue Rubber (Thailand) Public Company Limited, Sum Hitech Co., Ltd. (in 2015 the company sold shares to major shareholder of Sum Hitech Co.,Ltd.) Sirivit Stanley Co., Ltd., Top Hightech (Thailand) Co., Ltd. and Lumax Industries Limited of India. In addition, the Company formed a technical support alliance with Electro Polymers (PVT) Ltd. of Pakistan and Unitech Machines Limited of India.

The company has registered capital to 383.125 million baht and continued investment in Land around for new factory and new machinery and equipment for business expansion.

During years 2002 - 2010 the company has invested Lamp4 factory at Nava Nakorn Industrial Estate , Klong Luang, Pathumthani (in 2014, the Company sold land and buildings to the company that in the side area from not any operation and damaged by flooding in 2011) and Lamp 5 in the main area Muang , Pathum Thani

During year 2011 – 2013 Thailand's auto industry development and growth, respectively, but in the years 2011 have fluctuated dramatically from mega flooding in the central of Thailand impact on the automotive manufacturers and parts suppliers, the production and interruption and in 2012 from the needs of consumers returning to the policy of the government to make the first car sales and auto production record high. The company as a manufacturer of automotive parts has been ordered by customers many car manufacturers. As a result, the company is higher and opening of a new plant (Lamp7) to produced lamps for ECO Car, that selling are affect to growth of the automotive market.

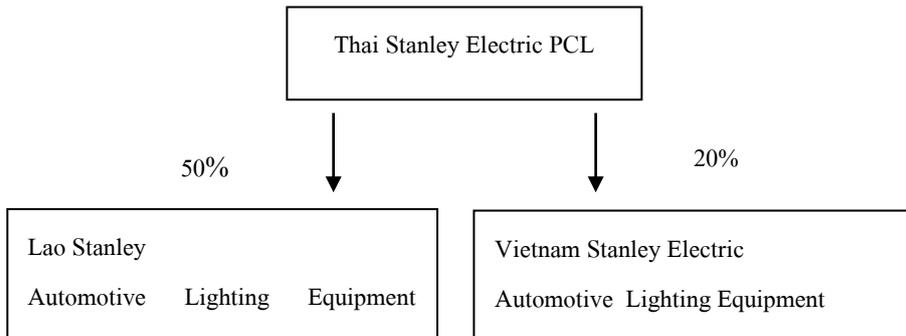

During year 2014 – 2016 the automotive industry fell again after delivery of the car from the first car out. The demand for automotive consumer that was used prior to the year 2012, making the auto industry downturn and the decline continued , Agricultural crops production less so the public revenue less and to spending was less than normal. Only Exports and motorcycle market have continued to grow slightly. the automotive manufacturers including companies as part manufacturers have tried hard to remedy the situation and results of operations.

During year 2017 - 2018, the automotive industry returned to recover. Sales and production of cars and motorcycles constantly increasing which is mainly domestic sales , the export market is still at a slow level. In order to support the increased production and new model of lighting products The company invested in the expansion of the 7th lamp manufacturing plant and new Mold factory , which will begin production in 2019 and start the construction of the Lamp 8 factory which will be completed and start production in 2020.

Management: Since the Company's initial establishment and subsequent listing on the SET, the original management team has continued in office without any significant change in management policy.

1.3 Company group holding structure

The company has 2 related company that manufacture of Lighting Equipment are Lao Stanley Company Limited at The Lao People's Democratic Republic and Vietnam Stanley Electric Company Limited at Socialist Republic Of Vietnam which are in the business of lighting equipment. The operations and management based on the consideration of the Board of Directors of each company based on the policy of Stanley group.

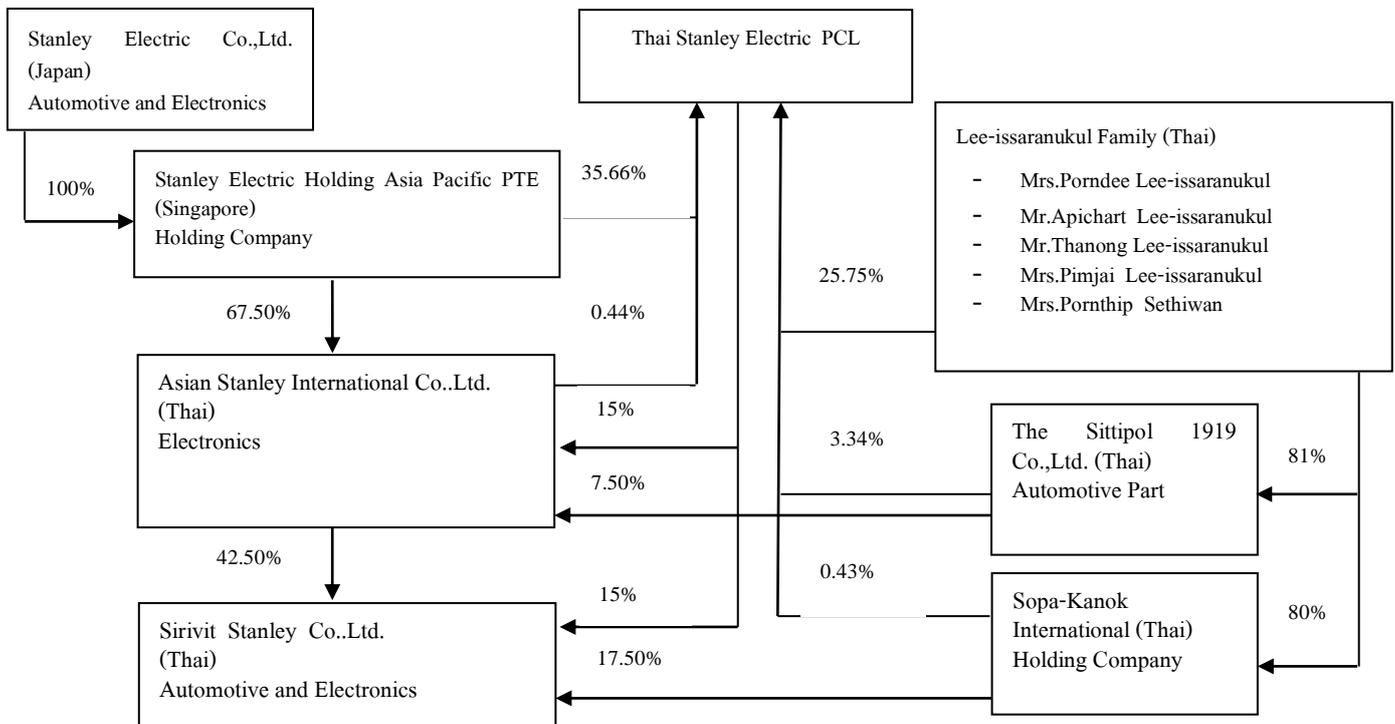

1.4 Major shareholder group Relationship

Major shareholder of the company is a group company Stanley Electric Co. Ltd. Japan and the Lee-issaranukul family , who is the founder of the company before listing on the SET. Each group has a representative on the board for the company.

Business operations in accordance with company policy accordance with the Stanley group policy.

Shareholding structure of business groups of major shareholders (data as March 31, 2019)

2. Conduct of business

The company currently manufactures and market auto bulb, automotive lighting equipment and dies & molds and design. The business segment information for dies & molds and design, which is different from auto bulb, automotive lighting, has not been separately reported as the sales of this segment represent only 1.80% of total sales.

Income Structure

(The Equity Method)

2.1 Nature of products

The Company's core business is to manufacture and sell products in a single sector, both domestic and export, namely lighting equipment for use in motorcars, motorcycles and other vehicles. There are 2 core products:

- Auto Bulb the company manufactures bulbs for automobiles, such as Bulb T19, G18, RP30, S25 to assemble a collection of various types of automotive lamps are available sales through local dealers and sale export to Stanley group company and for supporting to production and assembly a set of automotive lamps.

- Lighting Equipment Lamps , the company manufacturing in the automotive parts such as Head Lamp, Rear Combination lamp or Tail lamp , Stop lamp , Signal Lamp and Room Lamp that jointly developed with automotive manufacturer in specific models.

In addition to the core products, the Company also manufactures all kinds of

- Dies & molds in support of the core business and for sale to other industrial operators. The details of the dies & molds and design segment are not identified in this filing because their sales account for only 1.80% of the Company's total sales.

Certificate of Promotion

The company received investment promotion from The Board Of Investment total 18 certificates of promotion as follows :

- (1) Manufacture Automotive Bulbs (Certificate of Promotion No. 1038/Sor. Aor./2533)
- (2) Manufacture Automotive Lamps (Certificate of Promotion No. 1044/2527)
- (3) Manufacture Die & Mold (Certificate of Promotion No. 1214/Sor. Aor./2530)
- (4) Manufacture Die & Mold (Certificate of Promotion No. 1078/Sor. Aor./2533)
- (5) Manufacture of Automotive Lighting Equipment and parts
(Certificate of Promotion No. 1279/Sor. Aor./2533)
- (6) Research & Development of Automotive Lighting Equipment
(Certificate of Promotion No. 1176/2534)
- (7) Manufacture Die & Mold (Certificate of Promotion No 1767/2538)
- (8) Manufacture of automotive Lighting Equipment, Machine or Electrical
(Certificate of promotion No. 5675/2539)
- (9) Manufacture Electronic Bulbs (Certificate of promotion No. 1016/2541)
- (10) Manufacture Engineering Plastic parts
(Certificate of Promotion No. 1017/2541)
- (11) Manufacture of automotive Lighting Equipment, Machine or Electrical
(Certificate of Promotion No. 4290/2541)
- (12) Manufacture of automotive Lighting Equipment, Machine or Electrical
(Certificate of promotion No. 4573/2541)
- (13) Manufacture Die & Mold (Certificate of Promotion No 1096/2543)
- (14) Electronic Design (Certificate of promotion No. 1294 (2)/2545)
- (15) Manufacture and repair Die & Mold (Certificate of promotion No. 1539 (2)/2545)
- (16) Manufacture of Automotive Parts (Certificate of Promotion No.1545 (2)/2546)
- (17) International Standard Lamp for economic car
(Certificate of Promotion No.1631(2)/2012)
- (18) Manufacture and repair Die & Mold (Certificate of promotion No.2216(2)/2013)

Now the company have right from received investment promotion from The Board Of Investment total 2 certificates of promotion as follows :

1. Certificate of Promotion No. 1631 (2)/2012 , was issued on 22 May 2012 to engage in the international standard Lamp economic car , category 4.10 vehicle part production . The privileges and benefits under Certificate of Promotion No. 1631(2)/2012 include the following: Certificate

1. Be exempted from import duty on machinery as approved by the BOI

2. Has been a reduction of 90% of the incoming rate to import raw material or necessary material required for use in the production of distributors in the country for 1 year from the first day of imported. The raw and necessary material must not be same as made in a similar quality to the imports, and a sufficient quantity to supply them and in term and conditions in the time of the BOI to stipulate.

3. Be exempt the income tax , net profit from operations that have been promoted but not exceed 100% of the total investment , excluding land and current capital for 8 years from the date of the income from the operation. In the calculation of net income that including income from the sale of defect from productions.

The loss of business during the income tax exemption , that losses can be deducted from the net profit after the period of exemption from income tax that for a period not exceeding five years from the date of expiration of the period , by deducting from net income of any year or many year.

7. Quality of products from manufactured or assembled. Must be in accordance with international standards.

Project Conditions

1. Machinery for the promoted business must be a new machine and purchasing within March 4 ,2016.
2. The operation must be completed within 36 months from the date of the promotion.
3. The implementation of significant projects have been promoted in the following.
 - 3.1 Kind of product : Mold and Mold Repair .
 - 3.2 Size of the business. The production capacity for Mold , about 100 sets and Mold repair 50 sets per year. (Working time 16 hours / day : 300 days / year) , outgrowth is defect from productions
4. Minimum investment (Excluding land and current capital) not less than 1 million Baht
5. Income tax exemption worth up not over than 190,000,000 baht.

2.2 Market and competition

a. Policy and marketing

Because of the limited competition in this industry, the Company's strategy is to manufacture high-quality products at a reasonable price. The pricing policy is based on the cost of manufacturing with a standard profit margin. The Company also has a policy of expanding additional lines of automotive products to meet the demand in the automotive market.

The Company's customers include manufacturers and distributors of motorcycles and motorcars (passenger cars and commercial vehicles). The Sittipol 1919 Co., Ltd. is the Company's dealer in automotive spare parts that The Company has not paid any compensation to dealers.

Distribution channels and customer base

1. Local channels

1.1 Original equipment market: The products are sold directly to local assembly plants in Thailand. Usually, they are used in the manufacturing process or kept as spare parts.

1.2 Replacement equipment market: The products are sold through the Company's dealer, The Sittipol 1919 Co., Ltd. In this market, the products are as replacements.

2. International channels

2.1 Original equipment market: The products are sold directly to local assembly plants abroad. Usually, they are used for manufacturing or kept as spare parts.

2.2 Inter-member market: The products are export sold to each international member of the Stanley Group which engages in automotive assembly. This is to enable those members to assure the availability and quality of their stock. Deliveries are made on their orders from time to time on the basis of a single source. That means the Company is the sole manufacturer and distributor of these kinds of products for the Stanley Group worldwide. This creates economies of scale and efficient cost control. For some members in the Stanley Group, if only a few items are required and it is not cost-effective to order them directly from another manufacturer, an occasional delivery from the Company is a better alternative.

In 2018, The company had domestic sale approximately 70.67% of the company total sale , increased 12.49% from the previous year which was the automotive industry in stagnation of economic conditions and export sales approximately 29.33% of the company's total sales , increased 6.61% that sale to foreign customers are in Asia, Europe and the USA.

b. Competition situation

The Company's policy in competitive to practice under the rules of the competition. Will not take any action as a monopoly or reduce competition or limited competition

In the local automotive lighting equipment industry, the competition is limited with very few market players. Basically, there are only 3 main manufacturers in Thailand. However, if compare by size of company , the potential for production and competitiveness there is only 1 company that be similar to the company and another are difference size . The company has advantages in terms of diverse customer base. because the Company's business integrates research and development, design, moulding, manufacturing, assembly and quality control. As regards cost, the Company can take advantage of its being a listed company so can obtaining lower cost financing through the Stock Exchange of Thailand. Currently, the company estimates the market share in high level that considering from the company's current products are in current automotive in Thailand . The customer is always evaluation satisfied in our quality, price and delivery .

The barriers to entry are high for the following reasons:

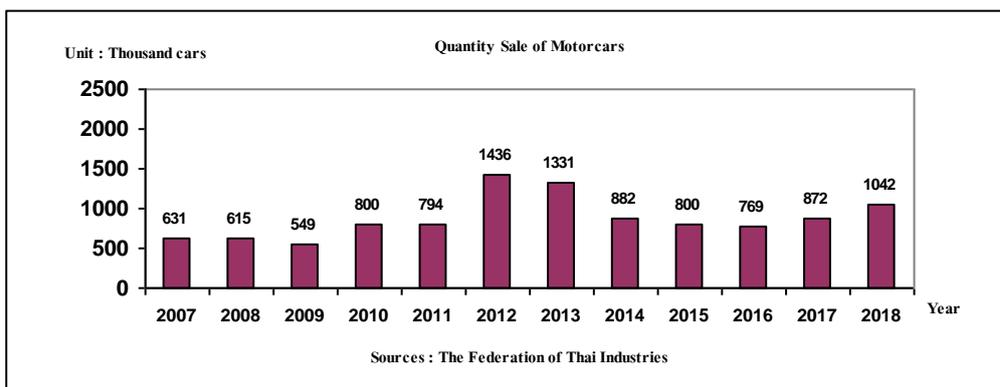

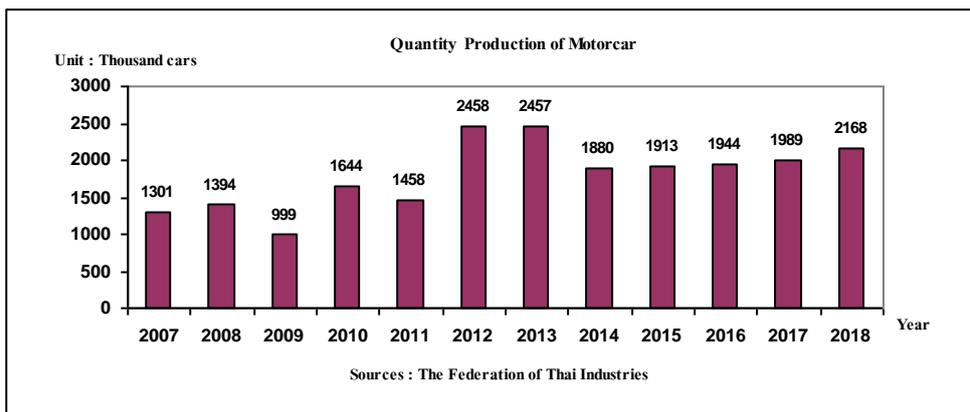

1. Significant investment is needed to acquire the costly machinery, tools and devices, including the equipment for quality testing.
2. The specialist training for workers is expensive and time-consuming.
3. The business naturally relies on specialised technology and must conform strictly to each country's safety standards.
4. The Company benefits greatly from the modern technology and valuable experience transferred from its joint venture partner, Stanley Electric Co., Ltd. of Japan, thereby increasing customers' confidence in the Company.

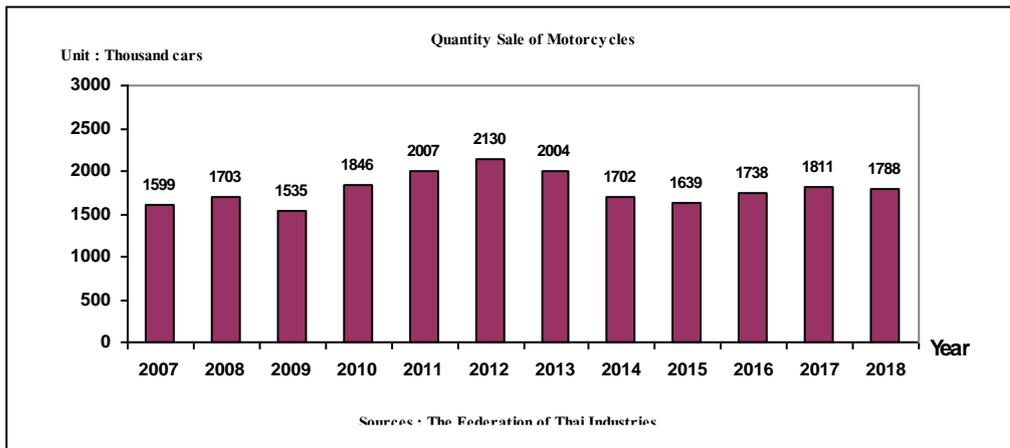

Because there are so few operators in this industry, the Company has the bargaining power over its customers at a particular level. However, the course of business is still based on the facts, especially, the basis of the actual cost of manufacturing plus standard profit.

Despite the limited number of operators in this industry, there are many suppliers. The Company has a non-monopoly policy with suppliers so that it can negotiate for the lowest price possible.

The automotive industry plays an essential role in the country's overall industrial development. Structurally, the automotive industry is linked to a wide range of other industries. That starts with basic materials, such as steel, plastic, rubber, glass and animal hides and the manufacture of automotive parts. The final process ends with assembly.

Over the past decade, Thailand's automotive industry has improved substantially, making Thailand the largest manufacturer of vehicles and component parts in Asian. The growth of the automotive industry over the past decade can be classified by types of vehicles: motorcars and motorcycles, details as follows

Remark : Not shown graph of motorcycle production data because production and sale are same level

In 2018, the situation of the automotive industry in Thailand In the overall car segment, both domestic production and sales The motorcycle sales decreased slightly. According to the overall economic situation in the country at a good level .

Naturally, the Company's business aims at the OEM market while the replacement market is its secondary channel. Therefore, the growth of the Company's business over the past decade has been in line with the direction of the country's automotive industry.

2.3 Supplies and services

a. Manufacturing and raw material

The Company has three manufacturing plants as follows:

1. Automotive bulb plant : capacity = 113 million pieces per year

All production from customers' orders and the other portion supplies the Company's lamp plant.

2. Automotive Lamp plant : capacity = 40 million pieces per year

All production from customers' orders

3. Die and Mold plant: Production = 400 pieces per year

All production from customers' orders and the other portion supplies the Company's lamp plant.

The Company currently acquires 71% of materials from local suppliers and 29% import from foreign suppliers. That their price has not changed significantly over the years. Details of local and foreign acquisition of materials over the past three years are as follows

Unit : Million Baht

Sources	31 March 2019		31 March 2018		31 March 2017	
	Amount	%	Amount	%	Amount	%
Local	10,341.66	70.67	4,258.22	70.57	3,397.57	67.95
Foreign	4,292.96	29.33	1,775.76	29.43	1,602.63	32.05
Total	14,634.62	100.00	6,033.98	100.00	5,000.20	100.00

The majority of materials are supplied by Stanley Electric Co.,Ltd. of Japan and other company members in the Stanley Group for the following reasons:

1.The material has characteristic features and can be acquired in large quantities from a single source to save costs. Conversely, it is not cost-effective for the Company itself to manufacture the material in Thailand because of the low demand.

2.A large order is necessary for cost-effectiveness. However, local demand is not large enough. In other words, a small order increases the cost. The Company has therefore opted to buy only essential material locally out of the total quantities obtained from Stanley Electric Co., Ltd. of Japan. This is to reduce the cost of procurement and the risk of dead stock.

3.A single source provides the material on the basis of the alliance among the members of the Stanley Group, resulting in economies of scale. The material is distributed to all other members worldwide.

The price of material provided by Stanley Electric Co., Ltd. of Japan and the Stanley Group is fixed at a reasonable and favourable level. The pricing formula is the actual cost plus administrative expenses. If some kinds of general material can be acquired from other suppliers on favourable conditions, the Company has absolute discretion to proceed with that procurement without abiding by any commitments within the Stanley Group.

b. Environmental impacts

In every production process , The Company to realized the effective to do not adversely affect the environment. For the painting process, a water shield and sludge disposal system are in place to prevent dust in the air. In this regard, the Company has engaged to the company which holds a waste disposal licence, to dispose of and treat the waste. Consequently, no pollution is emitted outside the Company's facilities. That means the environment suffers no impact from the Company's operations.

Now the company has completely Waste Water Treatment , the waste water from all factory will be sent in for proper treatment whose water level can be measured for the standard , that can be brought back for reused in production process and other activity such as toilet flushing , water plant and Lamp7 factory has reuse it in painting process and

flushing water for toilet , and other factory are adjusting this water for appropriate use. Therefore , the company have not any affect to environment.

In all circumstances, the Company recognises the importance of environmental conservation. It has campaigned for environmental management and was awarded ISO14001 certification .The company have designed our products to be environmentally friendly (green products) by relying on chemical-free substances or reducing the use of poisonous chemicals such as mercury (Hg), lead (Pb), chromium 6 (Cr6+), cadmium (Cd) and flame retardants (PBB & PBDE).

In addition, we also provide a green space project in the company , by providing a tree Planting activity on the last working day of the year , Enhancing the green space in the company and create a habit of environmental importance to employees.

The company has no disputes or litigation regarding environmental issues from local communities.

2.4 Undelivered Projects

- None –

3. Risk factors

In 2018, Thai Stanley Electric assessed major risk factors and determined measures to minimize them, of which details are as follows.

1.Manufacturing risk

Our customers are our first priority. We underline the importance of building trust and confidence in product quality and on-time delivery for customer's best satisfaction. We conducted surveillance against risk that could disrupt our manufacturing process and therefore damage machines or prevent raw material from being delivered to suppliers. Some of the risk management plans for our manufacturing activity previously prepared included:

- A database of secondary/reserved producers of raw materials in case main suppliers failed to deliver raw materials;
- Regular assessment of suppliers;
- A preventive machinery maintenance plan and a supplementary plan that would allow us to adjust the manufacturing area in case of emergency.

In addition, Thai Stanley Electric was accredited IATF16949 and ISO9001 for quality management system where a strict internal preventive-based inspection system to monitor quality of raw materials, the manufacturing process and product delivery to customers was implemented.

2. Financial risk

The Company does not have any risk relating to financial liquidity. However, since we import raw materials and equipment and export our products, mainly in Japanese Yen and US Dollar, we could be exposed to exchange rate volatility. We minimized this risk by buying forward contracts based on the policy to maintain forward contracts to 50% of our net liabilities in foreign currencies.

3. Computer and IT risk

We have increasingly introduced IT systems into our operation to collect data and enhance production capability in the manufacturing process, which means we could be exposed to IT safety risk or technology threat resulting from system defect or cyber attack.

To control and prevent the risk, we formulated rules and regulations regarding the use of IT system. IT disaster prevention plans and backup plans were drafted to prevent and manage the risk. Internal communication to create awareness in this subject was also conducted on a regular basis.

4. Safety, Occupational Health and Environment risk

The Company underlines the importance of quality of life of employees ranging from promoting operation safety to reducing workplace and out-of-work accidents and compliance with occupational safety and environment work rules and regulations.

The safety policy and plan was formulated and responsible persons were designated to supervise the safety. Campaigns to promote safety work culture were organized. An emergency response plan was written with a regular drill. We were certified to OHSAS18001 and recognized on a continuous basis as an outstanding workplace award in the HSSE area.

Regarding the environment, measures to ensure that our operation has no effect to communities and the environment were implemented. We have a wastewater treatment plant and quality of wastewater and emission was monitored to ensure no environmental impact. Industrial waste was managed in compliance with the laws and the company was certified to ISO14001 environmental management system.

5. Public utility risk

We heavily depend on public utilities ranging from electricity to running water in the production process. In case of emergency when there is a blackout or a shortage of water, this could disrupt our production process, which means we won't be able to deliver products to our customers. As a result, we implemented preventive measures by acquiring additional electricity from private companies, build our own water supply facility and plan a regular maintenance activity.

6. Risk from natural and other disasters

The Company was affected by Thailand's major flood in 2011 and is very much aware of the urgency to be prepared for the disaster. That's why we have put in place an emergency response plan and conduct a regular drill. In addition, we also recognize the risk from fire since it could create extensive damage and impact.

The Company have prepared preventive measures through strict surveillance. An annual fire drill is conducted every year. A Top Gun Team has been formed for emergency response.

The Company continue to place priority to the overall operation as well as our promise to deliver goods to customers regardless of circumstances. That's why any consideration about the risk materially related to business disruption must be jointly reviewed by the Risk Management Committee. A Business Continuity Plan (BCP) must be drafted and selected for every department to jointly conduct a drill on an annual basis. Identified material risks for which a BCP was written in 2018 included fire, flood, blackout, failure of IT system and epidemic.

In 2018, we selected the BCP affected by fire to exercise an annual drill with a purpose to keep continuing our operation despite the disaster. The department, which was responsible for this risk, was able to control and maintain efficiency while handling the situation together with other relevant units. It also managed to properly return the affected location to the original condition.

Since being founded, Thai Stanley Electric has seen no change in its structure of major shareholders or its business policy, which means no impact so far to its major shareholders and the management.

4. Assets for used in Business Operation

4.1 The main aspect of the company's fixed assets used in the business.

In addition to adding value to products, there is also a greater contribution to social security.

Social Performance

The Company's social performance can be divided into 4 groups as follows:

1. Labor Management and Human Resource Development

Labor Management

Realizing the value of our human resources, Thai Stanley Electrics Plc has established a labor management system to provide fair protection and treatment to our employees because we believe that this will result in higher quality of life and better productivity. We have formulated the Thai labor standard policy to guide our practice to meet the requirements of the Thai labor standards, labor laws and other regulations governing work enhancement.

Thai Labor Standard Policy

1. Thai Stanley Electrics commits to comply with the provisions of the Thai labor laws, requirements of the Thai labor standard as well as other relevant laws and regulations.

2. Thai Stanley strives to enhance the quality of life of our employees as well as workplace environment and welfare as appropriate and will work to have them improved or enhanced on a continued basis.

3. Thai Stanley will review the adequacy, the suitability and the effectiveness of our policy, work regulations and performance results.

The management convenes annually to review the adequacy and suitability of this policy. In addition, the Thai labor standard will apply not only internally to the entire organization but also to suppliers and subcontractors.

The Company has issued its labor management manual, considered an ultimate document of the labor management system according to the Thai Labor Standards explained below:

Discrimination The Company has expressed its intention not to support any discrimination action on employment, payment of wages and other financial supports, social welfares, training and development opportunities, promotion, employment termination, and retirement, which are due to the difference of nationality, race, religion, language, age, gender, marital status, sexual orientation, disability, HIV infection, preference of a political party, or personal concept and idea.

The company will never hinder, interfere, or conduct any action deemed to have affected the employees' rights and their routine practices without causing any damage to the company.

Child Labor The Company will never approve, support, or get involved in employing a child labor whose age is under 15 years old. Also, the company has never encouraged the use of child labor in any business activity that may cause an impact on occupational health and safety.

Pregnancy The Company will never allow any pregnant employee to work in inappropriate working conditions that will be harmful to her health and physical body. According to the relevant laws, pregnant ladies must be stationed in an appropriate working environment that will not affect their health and pregnancy. Similarly, there will be no termination of employment offered to pregnant employees, particularly during the pregnancy period. No diminution of position or benefits is always guaranteed due to pregnancy.

The company has cautiously evaluated this issue with its suppliers to promote the abolition of human rights in the Thai society.

Freedom of Business Association and Negotiation The Company provides its employees with the right to join various committees in the company and fully possess the right of negotiation, selection, or election of corporate representatives. The company will never hinder or interfere with the exercise of employees' rights. At present, the company possesses authorized representatives elected to represent the Welfare Committee and the Occupational Health and Safety Committee. The election will be held in every two years.

Since the establishment, The Company has never been involved in any labor dispute and there is no labor union existing in the company.

Welfare and Quality of Life Development , The Company takes into account the development of the quality of life of its employees to suit current economic conditions. To ensure the happiness of the work-life balance, the company has considered the increase of salaries for all employees on a yearly basis, while providing every personnel with appropriate organization-based welfares such as travel allowance, uniform, and laundry service. Employees will also be offered special presents for special occasions like birthday and the New Year festival. The company approves food expenses for diligent employees working overtime and outside the company. Furthermore, the company also remains alert in offering medical expenses to employees and their family members. These benefits will be considered and approved on a yearly basis.

The company organizes fun-filled activities to promote employees' good health, for example, sporting events and recreation activities. To foster greater awareness of Thai cultures for all employees, the company has launched its culture-based activities. Remarkable examples are the Buddha image bathing, Buddhist lent candle parade, dry-food almsgiving, and merit-making ceremony for special occasions.

Promoting the Use of Technology , We have produced a QR Code as an option for employees who use smart phones to download employee's manuals, training manuals and other types of manual in a more convenient manner. In addition, corporate work forms are accessible through the intranet via a program. This includes, for example, the Human Resource Management System (HRMS), which allows employees to submit leave forms based on their entitlement to supervisors who will approve it via the system, or a system to reserve meeting rooms and company cars.

At The Company, we have implemented the cashless project since 2017 in which we encourage employees to use less cash while making payments by relying more on Siam Commercial Bank's mobile application to pay, for example, food in the company's canteen and return of advance to our Finance & Accounting Department. The idea is to reduce the use of cash, increase transaction speed, promote sanitation by having vendors contact fewer banknotes and coins and foster technology that will help the country transiting into the Thailand 4.0 digital age.

In addition to carrying out internal labor activities in the company, for outside the company has always participated in labor activities with government agencies. In August 2018 the Company received the Outstanding Workplace Award for Labor Relations & Welfares from the Ministry of Labor for the 13th consecutive year.

Human Resources Development

The company has implemented the STARs Plan as a principal system to develop our human resources. The plan covers the capacity-building process and career advancement programs, which can be specified into six systems as follows.

1. Qualification , We determine job qualifications to reflect capacity levels of employees when it comes to their performances. The qualification is also used to determine fair and suitable remunerations.

2. Position , About duties, roles, authority and responsibility in each position of each department are clearly described. Promotion and qualification system are evaluated based on the criteria set by the Promotion Committee.

3. Rotation , This refers to the practice of rotating employees to work at another department to handle different types of work in order to create and enhance their capacity, which will finally allow them to be promoted.

4. Evaluation , The evaluation system determines criteria for evaluation, which will be used to support the increase of salary, awarding bonuses, promotion and career advancement. The system also reflects strengths and weaknesses of employees for further development. The evaluation criteria is based on the principles of fairness, suitability and acceptability.

5. Wage , The wage structure consists of base salary, competency allowance, title/position allowance and other assistance benefits such as overtime pay, overtime holiday pay, food stipend, attendance allowance and transportation and shift allowance. There will be an annual salary increase, which will be based on the following indexes: the government's increase of minimum wage, an inflation rate that indicates changes of the cost of living, and the industrial situation.

6. Skill Development , We strive through our policy to enhance employees' skill where minimum training hours for each level or position of employees are pre-determined.

The company will review training courses suitable for employees, namely, strategic training, training based on department work and self-development. The training can be internally and externally. Employees may be sent to train and work overseas with companies within the group.

In 2018, the company arranged 69 in house training course and 1,522 employees participated, with an average of 12 hours of training per employee and 232 employees participated in external training courses. These courses such as the Action Plan and Target , Performance Management System and Train The Trainer and 11 employees were sent to Japan for overseas training.

The Human Resources Department currently implements the Employee Training program to collect training information of all staff. Supervisors will evaluate employee's performance after they attend a training in conjunction with the annual employee performance assessment.

Thai Stanley Power Up Project

We have systematically started the HR capacity-building project through the four-year Thai Stanley Power Up program, which commences at LE's Reform Model. Year 1 of this program will focus at analysis and study of various factors that affect the enhancement of both human resources and the production process with a goal to accommodate our business growth and customers' demands. So far, we have organized the following 6 activities:

1. J-Com (Job Competency Management) . This is where rules and regulations required to manage capacity of staff at each level are written. PDCA-based criteria are created for each job, together with assessment methods and identification of weaknesses in order to upgrade the know-how and enhance staff's capacity that truly meet our demands in a more systematic way.

2. Smart Manager Course . Under this program, training courses are designed to strengthen management skills and capacity. Workshops are organized to deliver knowledge to future executives to enable them to set visions, foresee strategies and formulate work plans for the development of the organization they will be entrusted to oversee.

3. Expert Course. Training curriculums under this program are designed to nurture specialists who need to be knowledgeable in specific areas ranging from new model to mass production. The training techniques range from self-study to mentoring and exchanging ideas with senior management. Graduates from this expert course program will become the J-Com training instructor and help analyzing problems in the production process.

4. Survey Research . The survey is conducted to learn more about factors relating to personnel, organizational influence and corporate influence that could affect workplace behaviors and operation efficiency. A sampling group within the scopes of research is identified and the survey result is analyzed using both technical methodology and SPSS to learn more about strengths and weaknesses as well as possibilities to improve work behavior and efficiency in order to translate them into actual implementation.

5. Quality In House Program . The program refers to a computer program written to translate quality-related problems found in the production process into charts and graphs for a better and quicker understanding. Information is collected to identify probable causes. The data is also kept in a systematic manner for every plant to have a better access. In addition, problem-solving skills are enhanced so that each plant is able to resolve problems coherently.

6. 5S Patrol by Customer View. This refers to the quality and safety risk assessment conducted within the production process where problems are potentially perceived through a customer's lens so that effective solutions could be achieved and the production control process could continue to be enhanced.

At present, we are preparing relevant tools for these six main programs. So far, the progress has been in accordance with our plan.

The company has been certified with the Thai Labor Standard (TLS 8001 - 2010) of the complete version by the Ministry of Labor, which is audited on a yearly basis.

2. Safety , Occupational Health and Work Environment

The Company has prioritized safety as No. 1 issue in our management under a concept that “every employee will leave home for work and be back home safely in all aspects.”

Our Safety policy implemented hand in hand with each employee’s roles and responsibilities, is as follows.

1. The Company have setting workplace safety is the first priority when it comes to each employee working in their roles and responsibilities.

2. The Company strictly complies with all the rules, regulations and standards relating to safety occupational health and work environment as well as those implemented by our customers.

3. The Company promote and support the improvement of workplace environment, safe work practices, the use of personal protective equipment (PPE) and employees’ wellbeing.

4. The Company supports and promotes safety activities that will nurture safety awareness of employees both at workplace and otherwise. This includes, for example, building safe work culture, training, public relations and organizing safety contests.

5. The Company require supervisors at all levels to become a role model by leading, training and inducing employees and by nurturing their awareness of safe work practices.

6. The Company require all employees to take into consideration his/her own safety, the safety of their co-workers and company properties while performing their work.

7. The Company supports the 5S activity (de-cluttering, being convenient, clean and healthy, and nurturing safe habit) at our workplace in a strict manner to prevent accidents, work injury and work-related diseases.

8. The Company advocate for collaboration among employees in the HSSE project. Employees are entitled to advise ideas to improve workplace environment and safe work practices.

9. The Company provide human resource and financial budgets to manage the HSSE projects to ensure safe workplace for employees and the third party.

10. The Company have supported the Safety Shop Floor Management activity implemented to achieve the zero accident within the workplace and outside.

11. The Company setting an annual evaluation of these policies will be made at least once a year.

Safety Activities

The Safety Committee has been set up to consist of representatives from senior executives, elected and appointed representatives from our employees. At present we have 31 members Safety Committee to reviews policies and work plans, surveys the way we work as well as considers projects before submitting various operation reports to the Executive Board. The Safety Committee's term of office is two years and it convenes at least once a month. Meanwhile, the Safety and Environment Department, which directly reports to the management, is a main body to help supporting various units to achieve activities based on corporate goals. It also collects safety statistics as a means to improve and propose a better and safer workplace environment and employees' wellbeing.

In 2018, our safety policy was to create a safe workplace environment where accident became zero. The goal of accident-free working hour threshold before any work could be disrupted due to accident was set at 7,000,000 working hours and higher and the goal was achieved in May 2019. At the moment, the new accident-free working hour threshold is set at 10,000,000 hours.

We also opened the Safety Dojo Center to strengthen understanding and create safety awareness among our employees and third-party contractors. Not only the center assists us to achieve our zero-accident goal, but it also works as a training premise and a center for comprehensive safety learning. A simulation station at the center shows various risk scenarios that could occur from different situations. In addition, Thai Stanley Electric offers training opportunity to employees at this center each month. The third-party such as government agencies and education institutes may also visit this center as part of their study.

We organized the following safety activities on a continued basis:

- Safety training such as how to use a fork lift, executive training;
- Fire drill during day and night time;
- Top Gun's drill for emergency situation (Top Gun is the name of the highly-emergency response team);
- Safety, environment and energy conservation exhibitions

We also advocated safe practices through other means such as public announcement and Monday Meeting as well as through other media within the company to underline employees' safety awareness.

From 2011 until now , The company has been certified OHSAS18001 and from collaborating in various activities , making the company receive continuous safety awards. In 2018, the company received the following awards:

1. The Outstanding Occupational Health and Safety Award for the 15th consecutive year (August 2018).
2. Pathumthani Occupational Health and Safety Contest 2018 (Safety Dojo Project)
3. 2018 TCC Safety Activity Target and Achieving Audit (Level A) from Toyota Motors (Thailand) Co.,Ltd. (3d)

3.Supporting Local Communities and Society

The Company is located at Ban Klang , Pathumthani , and has been established outside the industrial estate location. The company is highly cautious of impacts that may possibly cause to the surrounding communities. Never having any dispute with the community, the Company is in collaboration with Ban Klang Municipality, representing communal people in organizing tradition-based activities, remarkable examples are the Buddha image bathing, Buddhist lent candle parade, dry-food almsgiving and to use of local food products is a set of snacks at the shareholders' meeting. The rice from the farmer group in Surin Province is processed into Difuku as a new year gift to customers.

For community development, the company has always relied on its unique employment model, where 80% of residents in Pathum Thani province and the nearby vicinity are employed. The company offers opportunities for students of local universities to visit factory for more knowledge and broader understanding on product manufacturing and management.

Since 2016 , The Company collaborated with Pathum Tani Provincial Office to organize the “Pathum Tani Public-Private Collaboration to Purchase Rice from Farmers” project to purchase rice from farmers in Surin, Yasothon, and Roi Et for use within the Company. Local farmers were also welcomed to sell their rice and products the market fair organized monthly by the Company.

Environment Performance and Energy Conservation

Environmental Management

The Company has set up the 23 member Environment Committee to underline our priority in environmental practices. The Environment Committee’s duties are to promote and recommend environmental management systems based on relevance to the environmental laws and other requirements to ensure compliance with the environmental policy of both The company and Japan Stanley. The Safety & Environment Department is the responsible agency for all activities encompassing all areas.

The Company ‘s environmental vision is as follows.

“We commit to conduct our corporate activities through effective use of resources and continuous development of environmental management systems to safeguard natural abundance and nurture environment in the sustainable society.”

To reflect our environmental vision, The Company has formulated the environmental policy to ensure that our staff are fully aware of their roles and responsibilities in environmental protection when it comes to their work. Details are as follows.

1. The Company committed to pursue and supervise the use of resources as well as prevent any environmental impact resulted from our activities in compliance with the environmental laws and other relevant requirements.

2. The Company intend to continue developing and improving our environmental management systems relating to our production process to reduce and prevent environmental impacts. We also strive to expand our practices to other parties involving in our activities.

3. The Company supports and promotes environmental activities including training and publicity to enhance staff’s environmental awareness and conservation and to directly and indirectly prevent and reduce environmental impacts.

4. The Company disclose our environmental policy as a way to communicate and express our commitment to control, protect, develop and improve our environmental management system to stakeholders and the public.

5. The Company support and participate in community environmental conservation activities through collaboration with state agencies, local governments and others.

6. The Company promote the environmental shop floor management to achieve our goal to have a good environmental system in place.

7. The Company conduct regular evaluations based on the environmental policy described above.

In 2018, The Company set a goal to enhance staff's environmental awareness. The following activities were carried out.

1. Main activities to reduce the use of resources were:

1.1 Reducing the use of water by 1% from the 2017 base year where indicators were the use of water per product and per a number of staff; the use of recycled water in the water curtain system during the glazing process in the lamp factory; and recycled water being used for lawn-watering and toilet flushing. We were able to achieve our goal by being able to reduce as much as 35,000 cubic meter of water per year.

1.2 Reducing the amount of waste destined for landfill by 5% from the 2017 base year through our campaign of waste separation and adjustment of waste disposal methods where waste was disposed through reusing and recycling instead. In addition, the Environment Committee conducted a monitoring activity on a quarterly basis to examine each department's waste separation. A training on waste management was held for staff to create awareness in this subject. Every department was encouraged to conduct at least one project that featured its attempt to reduce waste. We managed to achieve our goal as we underlined the importance of waste separation where trash was destroyed and bundled for sale as recycled waste. We also promoted the 5S activity focusing at cleanliness at all areas.

1.3 Reducing the use of paper by 1% from the 2017 base year where evaluation was implemented through the Excel program instead. In addition, the Information System Department wrote a program to handle materials no longer in use. Each department was asked to submit one project to reduce the use of paper within the department and the goal was achieved.

2. Regular environmental campaigns were organized to encourage staff to participate in the environmental conservation activities. For example, an exhibition was held on the World Environmental Day, a no-plastic bag activity was organized to reduce its use and a Green Factory was conducted in which the management and staff planted trees together to increase green area within the compound on the last work day of the year.

3. The senior management continued to monitor every work area on a monthly basis to maintain and improve the environment.

The Company also had the third party supervise and monitor its environmental quality where levels of various pollution within the compound ranging from noise to wastewater, heat and air quality were measured, the results of which were within the standards.

The Company have not found any violation of the environmental laws. There weren't any accident induced by the environment factor, either. We did not have any conflict or receive any environmental complaint from communities or third-party agencies.

The Company has been certified for the ISO14001 (2015).

Energy Conservation Management

The Company has set up the Energy Committee whose members come from staff from all departments. The current 24 member Energy Committee oversees energy practices by ensuring that they align with the energy conservation policy and management procedures. The Committee is responsible for coordination, supervision and production of energy conservation reports. It also encourages the management to comply with the laws, having the Safety & Environment Department as a body to make all relevant activities happen.

The Company's energy conservation policy is as follows:

1. The Company be committed to effective energy management and conservation, while strictly pursuing energy conservation laws and regulations.

2. The Company consider energy conservation to be the responsibility of top management and employees at all levels to cooperate in implementing the prescribed energy conservation measures, including the monitoring of outcomes to be reported to the Energy Conservation Committee on a regular basis. This reflects the company's passionate desire to continuously improve energy efficiency.

3. The Company allocate sufficient resources for energy conservation and management to ensure that the idea is in line with the company's objectives and goals.

4. The Company develop effective production process including activities related to energy consumption aiming for the achievement of energy conservation and management, considered part of the company's operations.

5. The Company improve energy efficiency to be in line with the nature and amount of energy used, where modern technology and good practices are applied in an appropriate and continuous manner.

6. The Company look for clean energy that allows energy conservation and sustainable environment. We are ready to disclose, inform and publicize our energy conservation activities to relevant parties and the public.

7. To Reducing the emission of CO₂ 5% from the 2013 base year (target 9.51 Ton Co₂ /MTHB, 2013 result 10.01 Ton Co₂/MTHB)

In 2018, Thai Stanley Electric's goals and activities in energy conservation were as follows.

- Reducing the emission of CO₂ from the 2013 base year by 5% through the Yellow Card activity where use of energy was tested; conducting training to promote awareness in energy consumption; promoting renewable energy in the form of solar rooftop.

In August 2018, Thai Stanley Electric installed solar cell panels on the rooftop of our Lamp 7 Factory and the PQC Building, which encompasses a canteen, a library, a gym, an area for supporting production engineering and the training area of production staff before they are dispatched to work in the production line. The PQC Building was built with energy conservation in mind where the LED lighting is implemented together with the dimming switch while some of its areas are lit by natural light. The 14,282-square meter area required 1.2 MW electrical capacity. In the end, about 1,619,000 kWh/Year of produced energy was reduced and 963,305 ton CO₂/year was emitted less than before, which estimate to help us reduce the energy consumption worth Baht 6,815,990 per year.

The Company also conducted activities aimed to reduce electricity consumption with a goal to reduce 5% of our overall consumption from 2013's level of 9.51 ton CO₂/MTHB. The activities conducted to achieve this goal included the installation of power meters where information of electricity consumption was analyzed to find a loophole. In addition, a campaign was organized to reduce power consumption during holidays where the production line was suspended once a month on Sunday. This resulted in the goal of reduced power consumption being met as witnessed from the electric consumption level of 9.11 ton CO₂/MTHB.

Besides, The Company continued to urge staff to effectively use the resources where environmental and energy consumption was promoted as corporate culture. Activities were translated into photos and slogans being posted at various sites for staff's visibility. In addition, the message was transmitted through our internal broadcasting system on a daily basis at 11.30 hours. The executive board underlines the importance of continuous monitoring and advising environmental conservation activities on a quarterly basis. In addition, our potential to conduct energy conservation and our energy management status was regularly evaluated.

10.3 Business operations that affect social responsibility

-None

10.4 Activities for social and environmental benefits (CSR after process)

Stanley Thailand Foundation activities

The Stanley Group has established the Stanley Thailand Foundation since 1993, aiming to promote various CSR activities mainly in Pathum Thani province. Remarkable examples of CSR activities launched in 2018 can be described below:

1. Education Activity

1.1 The foundation had presented annual scholarships to 1,239 students from 16 schools in Pathum Thani province and 6 schools in Nakhon Ratchasima province.

For individualized scholarships (Outshining Fund), the foundation was consistently responsible for all education-related costs starting from the high school to Bachelor's Degree levels. In 2018, 2 outstanding students from Chitralada

Technology College were selected to take part in the individualized scholarship program, where 4 students were already graduated with a Bachelor's Degree. Currently, there are 19 students selected to join the program.

1.2 The foundation offered its concrete support to the science competition named the Stanley Science Project Contest held to encourage primary and secondary students to create excellent robotic devices. The competition was hosted by the Technology Promotion Association (Thailand-Japan) and Buddhadhamma Camp Project of Watbangkudithong, Pathumthani

1.3 The foundation donated educational equipment as books for library and 300 bicycles to 30 schools in Lad Lum Kaew, Thayaburi, Lam Luk Ka, and Nong Sua communities.

2. Environment Activity

The foundation had donated garbage to communities in Pathumthani such as Banklang Municipality, Kukwang Municipality and Suan Prik Thai Subdistrict Administrative Organization.

3. Charity Activity

The foundation had donated other necessities for HIV-patient of Wat Phra Bat Nam Phu in Lopburi province and lame children of the Ruamphanya Person Lame Association in Nonthaburi province. In addition, the foundation also donated money to help flood victims in Laos.

In January 2019, the foundation cooperated with Safety & Environment Department, Thai Stanley Electric PCL. to arrange Safety To School at Watbangkuwat, Muang, Pathumthani by providing safety knowledge, fire demonstration and the foundation gave 10 sets of fire extinguishers to schools.

11. Internal Control and Risk Management

The company is aware of the importance to good management and internal control. The company established the CG department to conduct internal audit and risk management and report directly to the Audit Committee every quarter

Internal Control

11.1 The board of director comment on internal control

(2) The Audit Committee 's opinion that taking care of the Chief Audit qualification experience with adequate training and proper operation.

(3) The appointment, removal and transfer of the incumbent Chief of Office of internal audit according to the personnel management system of the company. Through the approval of the Executive Board and acknowledged and approved by the Audit Committee.

Risk Management

The risk management policy is as follows.

“We must guarantee the safety of our employees’ life and body, which we considered having the highest priority. We must take care of property and implement measures against risk by cooperating with local organizations and government agencies, nurturing the relationship with different businesses and presenting necessary and adequate information for the implementation of risk prevention measures.”

The Company has set up the Risk Management Committee whose duties are to review risk factors, opportunities and the extent of damage that may affect the management policy. The Risk Management Committee oversees risk practices to ensure their compliance with relevant laws or standards. The Committee consists of executive directors and department manager and higher, having the Risk Management Department being its secretary.

In 2018, Thai Stanley Electric revised risk management standards by aligning its practices with the quality management system governing auto part manufacturing (IATF16949). We also formulated a risk management framework that could be applied with the Enterprise Risk Management Framework, which consisted of the following:

1. Risk management strategies

The Company preparing a list of major risks and report and control by having operation control manager (department manager), whose role was to determine directions and strategies in annual operation, report and supervise risks. As a result, we were able to acquire information crucial for identifying operation risks that corresponded to our main policy.

The strategy enabled us to acquire information for general and risk management in relation to the Operation Unit in a concrete manner. It also allowed us to determine capability in assessing, analysis and finding means to manage and control risk at the high-level chain of command of the Operation Unit.

2. Risk management process

In 2018, The Company has set risk management framework to meet the COSO ERM 2017 with an increasing focus at supervising and controlling risk factors relating to the environment, society and governance (ESG). This was carried out to minimize impact that may affect our operation to meet business objectives while safeguarding operation within the risk management context. The following were the scopes of risk management review:

1. Strategic risk management
2. Operation risk management
3. Financial risk management
4. Compliance supervision and control

In risk management process to setting roles and responsibilities of responsible bodies had been determined based on their obligations within the chain of command. We expect our risk supervision and control as well as the risk management reporting process to clearer and more effective.

12. The related transactions

Since last 3 years, there was no event of spending the income from stock sales for any of the shared interest person.

The Company has significant transactions with related companies. Which is a company with common directors and the company in which the major shareholder holds shares. The related transactions are in accordance with the operating policy regarding the purchase and sale of goods and assets. Approved by the Board of Directors and is controlled by the Executive Board, which will be considered and approved according to the value of the transaction size regularly

The significant trade with the related company by purchasing and sales items. The company's auditor gave the explanation in the Note 28 Page 43 - 44 of the financial statement on 31st March 2019. The purchasing items from the related company are those particular raw materials or merchandise from the same production source at the great quantity to reduce the production cost. The company received the confirmation report from the related company about the sales of raw materials as the regular trading business. The sales items are mostly exporting by set up the sales price from cost fee plus the profit.

Royalty fee to a related company at the rate of 3% of sales minus the cost of importing raw materials from that related company, and specified as the regular trading business, details as follows:

Other Income total 272.45 million baht , increased 36.99% from the previous year . Other income mainly from dividend income from Stanley Group and other income such as Interest income , Dividend income , Gain on Exchange rate and Scrap sales.

Expense – Cost of sale was 11,864.53 million baht or 81.07% of total sale and increased 10.11% from the previous year , Cost increase in proportion to sales.

Gross margin was 2,770.09 million baht or 18.93% of total sale and increased 13.30% from the previous year

Selling and Administration expense was 927.80 million baht or 6.34% of total sale , increased 4.25% from the previous year , that increasing from Royalty fee paid to Stanley Electric Co.,Ltd. In rate 3% from net sale (Sale minus purchased material from that company).

Operating profit was 2,114.74 million baht or 14.45% of total sale and increased 20.58% from the previous year ,

Net profit was 1,977.76 million baht or 13.51% of total sale and increased from the previous year 19.242% . The overall profit increased due to the increase in the company's revenue according to the industry. And the ability to control costs at a good level thus resulting in a higher profit margin than the income rate .

Asset Management

Total Assets

As at 31 March 2019 ,total assets were 19,254.50 million baht increase from the last year 13.67 %. The main item as follows:

- Current assets were 9,033.80 million baht or 46.92% of total assets , decreased 2.76% from the previous year from Short-term investment held to maturity 3,625.00 million baht or 18.83% of total asset , decreased 13.95%, Cash and cash equivalents 1,672.00 million baht or 8.68% of total asset , decreased 16.90% , Trade and other accounts receivable , net 2,549.18 million baht or 13.24% of total asset , increased 8.58% . Current assets decreased due to the use of investment in fixed assets for business expansion.

Inventories net were 1,099.78 million baht ,or 5.71% of total sale , increased 63.00% from the work in the process of mold factory .

- Non-current assets were 10,220.70 million baht , or 53.08% of total assets , increased 33.63% from Property, plant and equipment net were 7,703.01 million baht increased 38.42%, that the company have to investment in Lamp 7 factory expansion that now completely and investment for new Mold factory construction and estimate to completely in end of 2019.

As the result of profit increasing ,the company ratio for return on asset was 10.93% increase from the previous year that ratio was 10.33% , fixed asset return ratio was 45.20% decrease from the previous year that ratio was 49.17% and asset turnover ratio was 0.82 times increased as few from the previous year that ratio was 0.84 times.

Total Liabilities

Total liabilities of the company were 3,287.94 million baht or 17.08% of total assets , increased from last year 36.58% which comes from the trade accounts payable in construction and material , increased as production increasing . so the company account payable turnover ratio was 6.11 time , decreased from the previous year ratio was 7.93 times

Equity

Total equity was 15,966.56 million baht or 82.92% of total assets , increased 9.88% from the previous year and return on equity ratio was 12.97% increase from the previous year that ratio was 11.91%

Cash flow structure

The company had cash and cash equivalents, net 1,672.00 million, decreased 12.43% from the previous year , that from more investment expansion so current ratio was 3.13 times also decreased from the previous year that 4.50% and to classified as cash flows from operating activities amount 2,503.77 million baht cash used in investing activities was 2,308.22 million baht and financing activities for dividend by 536.37 million baht .

In 2018 The company continue investment in Lamp 8 factory , to support in the automotive industry increasing trend and for Die & Mold part that for support to new model production that continuing launch .

Debt servicing obligations and management of off-balance sheet obligations.

The Company adopts the policy to use cash flow to invest and spend in the company. Do not focus on lending , the company has no outstanding debt and interest expense. There are only account payable liabilities and commercial liabilities as usual , the company has a debt to equity shareholders ratio was 0.21 times higher nearly as last year that ratio was 0.17 times ,from construction investment and purchasing in raw material but it is very small because the company has very little debt.

14.2 Factors or events that could affect the financial position or operations significantly in the future.

The economic conditions and automotive industry is the main factor that directly affects the company's operations The current economic situation in the country continues to grow. For the export market, there is a decrease in economic conditions and trade war problems that still have to monitor the situation continuously .The company is still trying to use various cost reduction measures. In order to comply with such situation

The company continues to make a significant contribution to research and development. Customers still have plans to launch new models constantly, the company continues to gain the trust of getting to Lamp products throughout.
